

Bedtime Math

Quick, wacky family math.
Dinnertime. Bathtime. Any time.

What is Bedtime Math?

- Bedtime Math is a nonprofit dedicated to helping kids learn to love numbers
- Parents find a wacky new problem every night on website, free app and email
 - Each problem starts with a story
 - Three levels for ages 3-9
 - No logins, no drilling, no scores
 - Just five minutes a day, with a focus on fun!

Bedtime Math: Where to find it

- On the web: www.bedtimemath.org
- One a free app – available for iPhone/iPad or Android
- One of three Bedtime Math books:

Math Made for Preschoolers

- Wee Ones problems are age-appropriate for kids in Head Start classrooms
- Focus on building blocks of math
 - Numbers: What numbers do we say to count?
 - Sizes: Which one is bigger?
 - Shapes: Find the circle and the triangle.
 - Patterns: What comes next?

Sample “Wee Ones” Problem

If you want to cook 4 eggs for breakfast, what numbers do you say to count them?

The Results Are In!

- New study from University of Chicago
- Study included 587 first graders who received math or reading app to do at home
- Doing Bedtime Math at home significantly boosts math skills
 - Kids gained 3 months in math skills
 - Kids of “math-anxious parents” did even better, gaining up to half a school year
